WHY IMS

OUR PEOPLE

IMS delivers confidence and capability through our employees. Consultants are trained in each aspect of the Synchronous Data Link Control (SDLC) process, with industry leading competencies in Analysis, Design, Implementation, Training, and Information Assurance. All consultants have a degree in fields such as Business, Information Technology, and Computer Science. Nearly half of the IMS workforce possesses post-graduate degrees.

OUR PROCESSES

IMS utilizes agile development methodologies using enhanced interpretations of traditional implementations. This allows us to leverage tried-and-true methodologies, amplified by bringing proprietary efficiencies into the process. The results are remarkable quality, performance, and timeliness.

OUR TECHNOLOGY

IMS can deliver your project in any format required. We use Microsoft and Oracle products for most of our web, windows, and mobile applications. If our customer is tied to any product, we can bring the breadth of our experience to bear on it. In the past, we have built solutions for customers that run on top of or within their current IT infrastructure.

WHAT WE DO

i-Mazing will help you make the vast quantities of data your organization collects, or needs to collect, into useable, actionable information. IMS uses this data to support your business and Information Technology needs.

Information Technology			Business	
				
DATABASE DESIGN	SOFTWARE DEVELOPMENT	INFORMATION SECURITY	MANAGEMENT CONSULTING	MANAGEMENT REPORTING

INFORMATION TECHNOLOGY

IMS performs on-site and off-site support in the areas of reporting, consisting of creating static and ad-hoc reports using proprietary databases and programming logic created in house. IMS utilizes Microsoft and Oracle products to design and implement intelligent business solutions and incorporates industry standards and best practices to securely store and control sensitive data. IMS also modernizes end-of-life legacy applications to leverage current technologies.

BUSINESS

IMS has assisted government and commercial clients with various data driven requirements, including forecasting, budgeting and execution tracking to help managers understand the work being performed and communicating the information, including their own Management Team, Commander Navy Regional Maintenance Center (CNRMC), Resource Sponsors, and Program Managers. Additionally, IMS supports the Submarine, Surface, and Carrier operations of MARMC by providing manpower forecasting and execution tracking on various scheduled and emergent tasking.
